

WARNING

- Risk of shock and fire. Disconnect power before installation.
- Installation should only be performed by a certified electrician.
- FSTRS fixtures are for indoor dry/damp locations only.
- If units exhibit any nonstandard behavior, disconnect power and contact Fidelux.
- Ensure proper operation of each fixture when installed.

SURFACE MOUNTING

1. Ensure line power is off.
2. Remove lens.
3. Mount and secure housing to surface (Diagram #s 1 and 2).
4. Carefully hang gear tray from safety tethers.
5. Ensure line power is off. Connect to line power, confirming that all wiring and power connection is in accordance with applicable codes (Diagram #s 3 and 4).
6. Reconnect gear tray to housing (See diagram #s 5).
7. Reattach lens (See diagram #6).
8. Apply power and check for correct fixture operation.
